

Workshop aims to expose the participants towards development and evaluation of complex interventions through interactive and practice based sessions along with theoretical learning in intervention research.

### **Mission**

- To help the participants to familiarise with rationale and framework for complex intervention development.
- To help the participants develop knowledge about different components of intervention, research design, methodology
- To train the participants in developing interventions using theory of change toolkit
- To help the participants to design their own realistic evaluation of their research
- To develop confidence as independent intervention

Researcher)
